

APPENDIX 2

Vizcaíno et al., 2017. On an album of photographs recording fossils in the "old collections" of the Museo de La Plata and Ameghino's private collection at the beginning of the XXth century. *Publicación Electrónica de la Asociación Paleontológica Argentina*.

Digital reproduction of W.B. Scott's notebook assembled in Argentina and kept in the Yale Peabody Museum Vertebrate Paleontology divisional archives (VPAR.002147).

Reproduced with permission of Christopher Norris and Division of Vertebrate Paleontology at Yale Peabody Museum.

It is titled "Index to Album, List of Negatives + Box List, of the Photographs of Specimens in the Collections of La Plata + Buenos Aires". It is divided into three sections. The first begins on page 2 and ends on page 65, is organized alphabetically by taxon, and lists "Name" (taxon), "Subject" (material), "N°." (negative number), "Page" (page in the album), Box (in Roman numerals, we assume of the boxes in which glass negatives were packaged for travel from Argentina to USA), "Collection" ("Ameghino", "La Plata Museum" or "Buenos Aires Museum), and "Formation". The second section, "List of Negatives, in Numerical Order", begins on page 67 and ends on page 95 and includes "N°" (the negative number, with taxon or taxa), and "Box" (in Roman numerals, the box number). The third section, "Box-List of Negatives", begins on page 97 and ends on page 101 and includes "Box" (in Roman numerals, the box number), "Nos." (the numbers of the negatives in each box), and "Size" (the size of the negatives).

W. B. Scott,

Quincy, Ill.

La Plata, Oct. 23, 1901
